Preparation for High School and the Challenges and Opportunities to Come

Middle school can be a tough time for both students and parents. Bridges is designed to help parents help their kids manage the demands of middle school and prepare them for a life-time of success.

HOW IT WORKS

- Parents attend 4 meetings led by trained leaders
- Parents learn new ways to motivate, guide and support their teens to succeed in school and in life.
- Research shows that these skills are related to reduced parent-teen conflict, improved family relationships, strengthened parenting skills, and less distress for parents PLUS improved student success down the road, including improved grades and school motivation, higher rates of high school graduation, fewer discipline and emotional problems, and less teen drug and alcohol use.
