3:50 p.m. Jacob Siri – *Metacognition and strategic multitasking*

4:05 p.m. Casey May – *Reward processing and decision-making in posttraumatic stress disorder (PTSD)*
Since 1996, the annual Department of Psychology Graduate Research Colloquium has provided an opportunity for all second-year graduate students in the department to present their research in a forum open to the public. Developing, conducting, and presenting research projects are important activities for psychologists and central components of training in the department. The findings presented at the Graduate Research Colloquium represent the formative aspects of our students’ programs of research that often culminate in publications in peer-reviewed journals and presentations at scientific conferences.

Thank you for your support of our students’ research.
